Revolution 36CF See-Through

Classic Looks

These latest additions to the growing line of Fireplace Xtrordinair clean face fireplaces, the Revolution™ CF See-Through and the Pier allow you architecturally significant, 2-sided and 3-sided fireplaces to enhance the character of their living spaces. The Revolution 36CF See-Through and Pier combine the classic fireplace look with no grills or louvers, and the slim outside trim allows a huge view of the fire. The 36CF See-Through and Pier also allows you the ability to personalize the look of your fireplace with beautiful decorative options including reversible brick firebacks, high quality andirons and accent lights that allow you the ability to enjoy your fireplace, even when the fire is off.

36CF See-Thru/Pier Gas Fireplaces

Model 36CF See-Through & Pier

These fireplaces are intended to both separate and unite adjacent living areas with the beauty and warmth of fire. The opportunities to utilize these products in a home are many. Separating a living room from a dining room is probably the most common application, but why not place a See-Through fireplace between master bedroom and private bath? Or between an entry hall and a dining room? The Pier unit would be a delight if placed between a kitchen and family room, where you want a bit of separation, but still accommodate access to the view of the fire from many points in this busy area.

Your Green Choice In Clean Face Fireplaces

With a Steady State Efficiency of over 70% and the Electronic Gas valve that allows you to run your fireplace in either "Intermittent Pilot Mode" or "Standing Pilot Mode," the Revolution fireplace makes the ideal choice for those looking for a Green Alternative to other heat and gas wasting Clean Face fireplaces.

Advanced Performance

There's nothing traditional about the Revolution's performance. You have the ultimate in variety and control with variable flame regulation and heat output. The built-in flame control center is completely hidden so your only focus is on the fire. The dancing yellow flames interact with a remarkably realistic seven-piece driftwood log set on a iron log grate. The 58,000 Btus burner has a great turn-down ratio to 27,000 Btus on low, providing a warm, glowing ember bed just right for contemplative moments. Both units are bedroom & mobile home approved and vent on the back side at 45 degrees to make an easy transition to either horizontal or vertical flue.

Alpha Remote Control

Our Alpha™ Control compact remote handset. gives you unlimited control of your fireplace. Includes wall mount.

With the Alpha Control you can control:

1. Switch between Standing Pilot and Electronic Ignition
2. Flame Height (six settings)
3. Burner ON/OFF
4. Thermostat temperature setting
5. Accent Light ON/OFF and light intensity (six settings)
6. Optional Power Heat Duct Fan ON/OFF

Accent Light

Accent lights are a standard feature in both fireplaces, and the 2 lights in the ceiling of the fireplace shine down on the logs for a great presentation. The lights, also controlled with the remote handset, can be turned on or off and adjusted to three levels of illumination to suit the mood.

Design Your Own Look

A selection of three optional andirons is available. Firebacks are required, and we offer Straight Brick reversible to Herringbone, Diamond Mosaic reversible to Stucco, and sleek contemporary Brushed Stainless Steel.

Add Heat To Additional Rooms

One or two Power Heat Duct Kits may be installed with these fireplaces to capture heat from the sealed heat collection plenum and transfer it to an additional room in your home. This venting option uses a remote fan to pull heat off the fireplace a deliver it to an adjoining room. You can direct this heat upstairs, downstairs or anywhere in your home within 20 feet of the fireplace.
